REISSUE APPLICATION DECLARATION BY THE INVENTORS

Assistant Commissioner for Patents
Box REISSUE
Washington, D.C. 20231

Sir:

As a below named inventor, I hereby declare that:

1. My residence, mailing address and citizenship are stated below next to my name.
2. I believe I am an original, first and joint inventor of the subject matter which is described and claimed in U.S. Patent No. 6,016,028, granted January 18, 2000, and for which a reissue patent is sought on the invention entitled "GLASS BULB FOR COLOR PICTURE TUBE AND THE SAME TUBE," the specification and claims of which are attached hereto.
3. I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by the Preliminary Amendment being filed herewith.
4. I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

20250537 011602

5. I hereby claim foreign priority benefits under 35 U.S.C. 119 of Japanese Patent Application No. P08-241364 filed on August 23, 1996. I further state that no foreign applications for patent or inventor's certificate were filed having a filing date before that of the above-identified application on which priority is claimed.

6. I verily believe the original patent to be partly inoperative or invalid by reason of a defective specification, and by reason of the patentee claiming more or less than he had the right to claim in the patent.

7. At least one error upon which reissue is based is described as follows: Claims 1 to 4, 6, 7 and 9 of the '028 patent each recites the phrase "color selection mechanism." The description of the invention in the specification does not include the phrase "color selection mechanism." Instead, the specification describes a "color selection mask 20." As a result, the specification may be defective under 35 U.S.C. 112 and/or 37 C.F.R. 1.75(d) for failing to provide antecedent basis for each term or phrase used in the claims, which may render the patent at least partly inoperative or invalid. The specification should be amended in the paragraph starting at column 4, line 17, as shown in the Preliminary Amendment accompanying this reissue application, to correct this error.

8. Another error upon which reissue is based is described as follows: Claims 6 and 9 of the '028 patent recite, among other things, that the color selection mechanism is formed of a plurality of "fine metal leads." The description of the invention in the specification does not include the phrase "fine metal leads." As a result, the specification may be defective under 35

U.S.C. 112 and/or 37 C.F.R. 1.75(d) for failing to provide antecedent basis for each term or phrase used in the claims, which may render the patent at least partly inoperative or invalid. The specification should be amended in the paragraph starting at column 4, line 62, as shown in the Preliminary Amendment accompanying this reissue application, to correct this error.

9. Another error upon which reissue is based is described as follows: The claims in the '028 patent are narrower than what was required to patentably distinguish the Applicants' invention from the prior art. Specifically, the limitation of "a peripheral area in the horizontal direction of the effective display area of the face plate is thicker than a center of the effective display area," as recited in claim 1, was not necessary to distinguish the Applicants' invention from the prior art. As a result, the Applicants claimed less than they had a right to claim in the '028 patent. To correct this and other perceived errors in the claims, new claims 10 to 16 have been added to claim additional subject matter to which the Applicants are believed to be entitled. Claims 10 to 16 are broader in some aspects, and narrower in some aspects, as compared to the issued claims 1 to 9 of the '028 patent.

10. This reissue application also includes certain amendments to correct typographical and grammatical errors of a minor nature in the '028 patent. These amendments include: in column 4, line 58, "refere" has been changed to --refer--; and in the third line of each of claims 6 and 9, "metal fine leads" has been changed to --fine metal leads--.

11. All errors which are being corrected in this reissue application up to the time of filing this declaration arose without any deceptive intention on the part of the applicants.
